ABSTRACT

Salon book is web based salon management application with appointment scheduling functionality. It connects clients, salons and stylists in online community allowing user to browse salon and stylists and book or cancel appointments. User can also write and read reviews of salons and particular stylists. Salons can specify stylists that work at there salons, as well as servies they offer. Salon can also book appointment for customers, and can view and print schedules in convenient formats.

Beauty parlor management system is a web-based salon management application with appointment scheduling functionality. In this system user can review salons and stylist online and can make appointment online. In this system beauty parlor owner can make their account online and give details of the services they offer and also describe the stylist information. User can review the salons and their services using this system and can make appointment with favorite stylist online. User can also cancel appointments online. User can also write and reviews about the salon or stylist. This system helps both the customer and the salon. Customer can easily find best salon in their locality and can check the review of other customer of that salon online. It helps him to take decision of taking the services of a particular salon. In present system you have to call the salon to fix an appointment. After taking an appointment you have to remember the date of the appointment. User is also not able to find the best salon in their locality. He can find out the services of any salon only after taking their services. But in proposed system you can check review online and find out who is giving best services. Use can also check that which salon gives good customer satisfaction.

In current system salon take appointment on register. They manage customer record on register. And it is very difficult to find out old appointment details in this system. Making report for the salon business is also very tiresome task. this system is prone to costly human error. Beauty parlor management system allow salon to manage stylists and services, promote sales to customers, and track customer satisfaction.
